

Earth Day Made Easy: Greywater Challenge

Core Activity: Greywater Reuse

1. Find a source of reusable water (greywater): leftover drinking water, rinsing fruits/vegetables, or water collected during handwashing.
2. Reuse it to water plants or soil.

Choose Your Pathway

Pathway	Activity
Engineering	Design a system to collect and reuse greywater.
Art	Create a poster, comic, or infographic.
Health	List ways water supports health and why saving matters.
Literature	Write a story, letter, or poem from water's perspective.
History	Compare past and present water reuse practices.

Why This Matters

Up to 60% of household water can be reused as greywater. Small actions can conserve water and support healthier communities.
